CacheFly SOLUTIONS

CacheFly is the world's best CDN for throughput.

We pioneered the world's first TCP anycast-based CDN and strategically placed over 64 global Points of Presence (PoP) near internet exchange points to deliver your rich media closer to your end-users.

CacheFly effectively delivers today's bandwidth-intensive rich media, including software updates and downloads, podcasts and audio, websites, social networking, online gaming, and video.

Our aggressive expansion strategies, coupled with a robust network footprint, makes us the world's fastest, most reliable CDN.
